

# Southern Alarm Systems Ltd

Specialists in: Design, Installation & Maintenance of Fire Alarms,  
Fire Extinguishers, CCTV & Access control

## Capabilities Statement

Southern Alarm Systems has provided businesses with a complete fire protection service for over 25 years ranging from design and installation to service and maintenance of fire alarms and fire extinguishers. We are Bafe accredited across all four modules for fire alarms and ISO approved for our quality control. This has led our company to deliver consistently and continuously a high level of service at competitive rates to customers throughout East and West Sussex.

Our experienced team of office staff and field engineers are able to assist customers at any time, from the smallest to the most intricate of challenges. This is achieved by all staff receiving the most recent training, giving them constant up to date knowledge of requirements.

We pride ourselves in delivering an exceptionally high standard of workmanship with excellent customer care at competitive rates.

### Our Services Include:

Design, Supply, Installation and Maintenance of:

- **Fire Extinguishers**
- Fire Alarms
- **Fire Training**
- Emergency Lighting
- **Access Control**
- CCTV
- **Escape Signage**
- Fire Plans

We provide our customers with a 24 hour 365 day emergency call out service.

### Our Clients

Our clients include:-

Nursery schools, Primary and Secondary Schools, Colleges, Hospitals, Nursing Homes, Fire Stations, Local County Council Properties, Disability Learning Centres and all types of other Commercial Properties within the East and West Sussex areas.

Due to the types and sensitivity with some of the establishments we visit Southern Alarm Systems undertakes the responsibility to ensure all staff that visit customers premises carry a valid identity card along with enhanced DBS check carried out. This is renewed every 3 years.

### Environmental

Our company is conscious of unnecessary impacts on the environment and is keen to have an active role in reducing its carbon footprint and contributing where it can. We have introduced electronic service reports for our engineers which the customer now receives via email. This eliminates unnecessary printing where the customer is able to keep electronic versions of all service history. Our aim is to become more efficient and significantly reduce the amount of paper we use to eventually become a paperless office.
